Response to Amendment

1. The amendment filed 5/13/2008, incorporating the limitations of dependent claim 78 into independent claim 71, has been entered.
2. As noted in the Office Action of 3/31/2008, Applicant's arguments, pp. 13-14, filed 1/7/08, with respect to the rejection of claim 78 were previously found to be persuasive, and all rejections of claim 78 were previously withdrawn. Accordingly, the present amendment places the application in condition for allowance, since independent claim 83 contains limitations similar to those in independent claim 71 (now including previously presented claim 78), as amended.

Allowable Subject Matter

3. Claims 71-77 and 73-93 (now renumbered 1-22) are allowed.
4. The following is an examiner's statement of reasons for allowance: These reasons for allowance should not be interpreted to imply that limitations not specifically mentioned are immaterial to patentability. The specific limitations identified below have been considered in combination with the entirety of the claim in determining patentability.

The prior art of record fails to disclose or reasonably suggest a system as claimed, including a hybrid fiber-coax network, an Internet access system and a user interface device connected to a display device, wherein the Internet access system

stores information including a *current state* of a *current session* with the user interface device, receives bookmark requests from the user interface device, and sets a bookmark that permits the a user to access the *current session* at the *current state* on an alternate display device *different* from the display device.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
